BASIC Clinical Research

This two day workshop developed and run by leading ICU researchers will introduce to the concepts of:

- Research process
- Research question
- Literature review
- Types of studies
- Research protocol
- Research ethics
- Data management & statistics
- Dissemination of findings

This course is aimed at **anaesthetic registrars, junior consultants, allied health professionals** planning to make research part of their non clinical portfolio in critical care.

The workshop will consist of small interactive group tutorials and skill stations. Pre-course reading will be provided.
